Project Progress

1

Conceptualization

Brainstorming ideas and defining the scope and functionalities of the website.

2

Design & Development

Designed the frontend of Homepage, Mobiliser, login-signup pages

3

Backend and Frontend Integration

Routing of web pages and integrating with the backup for functionality

4

Database and Responsiveness

Working on the responsiveness of website on PC as well as on Mobile, attaching with the database.
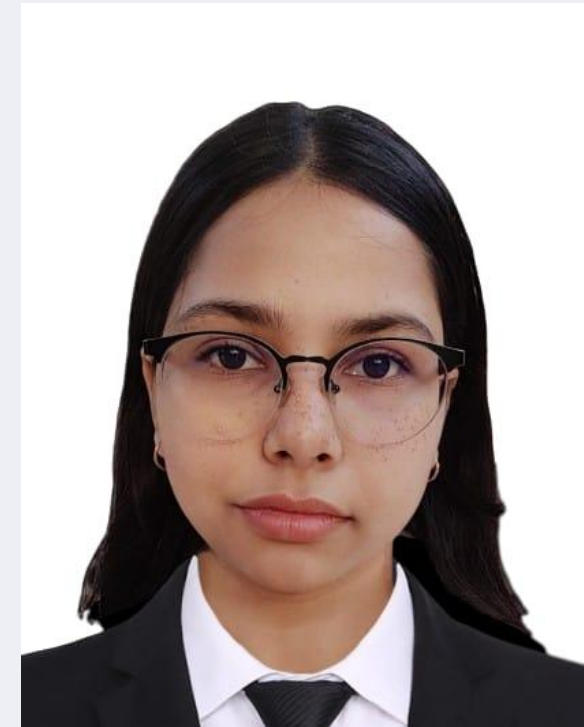

Introduction to the Team Members

Introducing our dedicated team of professionals orchestrating the creation of this impactful website for Jharkhand, united in their commitment to excellence.

Vishwas Gupta
(Data Administrator)

Arsh Krishaneter
(System-Test Engineer)

Saksham Bhardwaj
(Placement Coordinator)

Next Steps and Timeline

Our next three pivotal steps revolve around refining mobilization data, fortifying reporting mechanisms, and optimizing the payment landscape for our dedicated mobilizers.

Consolidate Mobilization Data:

Review and refine the mobilization data gathered so far, ensuring accuracy and completeness. Identify any potential areas for improvement in data management and streamline processes.

Enhance Reporting Mechanism:

Work on developing a comprehensive reporting system that provides real-time insights into candidate progress, camp effectiveness, and mobilizer performance. Implement visual representations, such as graphs and charts, to facilitate easier data interpretation.

Optimize Payment Management:

Further streamline the payment process, focusing on reducing turnaround time and improving transparency. Implement additional features for mobilizers, like automated notifications for pending payments and a user-friendly interface for tracking payment status.

Behind every line of code and strategic decision, lies the synergy of our dedicated team. Here's a glimpse into the collaborative spirit driving the development of the Jharkhand Government EdTech project—a testament to our shared commitment to excellence.

Thank-you
